## Personal Statement

I'm a versatile creative with a passion for creating compelling images that tell a story. I received formal training in illustration and traditional art from one of the most reputable and acclaimed art and design colleges in Canada where I learned visual storytelling, stylistic agility and became proficient with industry standard art and design tools and softwares. I thrive in finding innovative ways to solve design challenges with exciting new ideas such as lighting a 2D illustration using 3D graphics or incorporating physical media textures. I'm a believer that the best ideas arise from diverse perspectives, thoughtful listening and contribution, and an open and iterative creative process.
